ABOUT THE APCO FRAMEWORK

The APCO Packaging Sustainability Framework (the Framework) aims to provide a consistent and transparent framework for assessing and tracking packaging sustainability across organisations. The Framework consists of thirteen independent criteria that belong to three separate categories. These categories are (i) Leadership, (ii) Packaging Outcomes and (iii) Operations. The diagram above shows the different criteria included within each of these three categories.

There are two types of criteria within the Framework:

- **Core criteria** are mandatory and must be answered by all Members when completing the Annual Reporting Tool.
- **Recommended criteria** are not mandatory, but Members are encouraged to complete as many recommended criteria as possible.

Each criteria is divided into five levels of performance ranging from 'getting started' to 'beyond best practice'. The diagram above illustrates the key differences between performance levels. Please see www.packagingcovenant.org.au for more information.

ABOUT APCO

APCO is a co-regulatory, not for profit organisation that partners with government and industry to reduce the harmful impact of packaging on the Australian environment. APCO promotes sustainable design and recycling initiatives, waste to landfill reduction activities and circular economy projects. APCO Annual Reports are a key Membership obligation, providing Member organisations with a transparent method to track their packaging sustainability performance. Annual reporting also supplies APCO with valuable data and information to identify industry trends and advancements.

FREE FORM QUESTIONS

Describe initiatives, processes or practices that you have implemented during your chosen reporting period that have improved packaging sustainability.

7-Eleven continues to support the Closed Loop coffee cup recycling program through sponsorship, advertising, collection points and social media. The program has expanded during 2019 and this is described in our Case Study below.

In 2019 7-Eleven signed up to the PREP Tool and ARL via APCO and we are working towards assessing our current products against the Tool to form a baseline measurement. During 2020 we expect to begin moving our labelling for recycling to the ARL approach as each product is assessed.

Describe any opportunities or constraints that affected performance within your chosen reporting period.

7-Eleven are constantly assessing new and refreshed product lines for the ability to include recycled content, improve recyclability or reduce the amount of packaging. However, food safety standards and packaging quality often restrict our ability to make changes.
